#startupindia

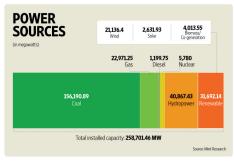

Major Potential Sectors in India

· Renewable Energy

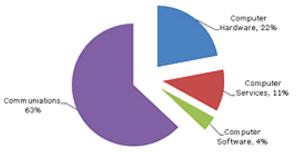

- India accounts for about 4% of the total global electricity generation and contributes 4.43% of the global renewable generation capacity.
- The International Energy Agency's world Energy Outlook projects a growth of renewable energy supply to 4,550 GW in 2040 on a global basis
- As of February 2018, total renewable power generation installed capacity in the country stood at 107.81 GW, which is 32.26% of the total installed capacity of 334.15 GW.

Information Energy

- India is the world's largest sourcing destination for the information technology (IT) industry, accounting for 67 per cent of the US\$ 124-130 billion market. The industry employs about 10 million workforces
- The IT industry has also created significant demand in the Indian education sector, especially for engineering and computer science.
 The Indian IT and ITeS industry is divided into four major segments – IT services, Business Process Management (BPM), software products and engineering services, and hardware.
